

1. What is PRINCE2?

- PRINCE2 = Projects IN Controlled Environments
 - Process-based, structured project management method
 - Focuses on:
 - Continuous business justification
 - Defined roles
 - Product-based planning
- Turning strategy into actual outputs

2. Four (4) Core Elements

- a. Principles - **guide** practices
- b. Themes - **aspects** being addressed
- c. Processes - project lifecycle **steps**
- d. Project Environment - context for tailoring

3. Seven (7) Principles

- a. Continued Business Justification
 - Documented Business Case
 - Must remain valid throughout project lifecycle
 - Stop project if no longer justifiable
- b. Learn From Experience
 - Learning Process:
 - Start: review past lessons
 - During: record new insights
 - Close: pass the knowledge
- c. Defined Roles and Responsibilities
 - Three stakeholder interests:
 - Business: ensuring value
 - User: defining requirements and use
 - Supplier: provides resources
- d. Manage by Stages
 - Management Stages
 - Minimum Stages:

- Initiation stage
- At least one delivery stage

e. Manage by Expectations

- Tolerances set for:
 - Time
 - Cost
 - Scope
 - Benefits
 - Risks
 - Quality
- Escalate only when exception occurs

f. Focus on Products

- Product Description:
 - Purpose
 - Composition
 - Quality
- Defines the specific products to be delivered

g. Tailored to Suit the Project Environment

- Adapt based on:
 - Scale
 - Complexity
 - Risk level

→ Business – Experience – Roles – Stages – Exception – Products – Tailor

4. Seven (7) Themes

Theme	Keyword Question	Core Idea
Business Case	Why?	Justification
Organization	Who?	Roles

Quality	What?	Quality attributes
Plans	How? When? How much?	Time & cost
Risk	What if?	Planning Uncertainty
Change	Impact?	Change
Progress	Where now? Continue?	Viability

5. Business Case Theme

- provides the justification for why the project should push through
- Used for decision-making
- Criteria:
 - Desirable
 - Viable
 - Achievable
- Lifecycle: Develop → Verify → Maintain → Confirm
- Key Contents:
 - Executive Summary
 - Business Options
 - Expected Benefits
 - Timeframes
 - Costs
 - Investment Appraisal
 - Major Risks

6. Management Levels

- Corporate / Programme Management - provide project mandate
- Project Board (Directing) - direction and decision-making
- Project Manager (Managing) - day-to-day control
- Team Manager (Delivering) - creating products
